

NISCHAL PURI

AI-First Full-Stack Developer · Next.js · MERN · AI Agents

+977 981-8275115 | nischalpuri.dev@gmail.com | Butwal, Nepal | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full-stack developer specializing in Next.js, React, TypeScript, and Node.js, with a track record as the sole engineer or technical lead on production client platforms — owning architecture, AI integration, and infrastructure end-to-end rather than a single layer of the stack. Builds AI features that do real work in production: tool-calling agents, LangGraph-orchestrated assistants, and multi-provider LLM routing (OpenAI, Anthropic, Gemini, Groq) grounded in live application data rather than demos. Promoted to technical lead within three months on a prior role, scaling and mentoring a team of 8+ engineers and designers. Comfortable being the only developer in the room: has personally set up CI/CD, authentication, and deployment infrastructure from zero for multiple client companies.

EXPERIENCE

AI-First Full-Stack Developer — Independent — Client Contracts

Jan 2026 – Present

- **Sole engineer** on **MeroBhumi**, a live real-estate platform for Nepal — owned the product, API, and infrastructure end-to-end, including standing up the company's environments, CI/CD, and deployments from scratch.
- Architected a standalone Node/Express API service with a **self-built OAuth + JWT/session auth layer** and role-aware middleware, keeping the backend independently scalable instead of coupled to framework routing.
- Shipped an AI assistant using **tool-calling against the live database**, so answers reflect current listings in real time rather than a stale search index.
- Delivered **WN Wellness Equipment**, an SEO-optimized, server-rendered B2B storefront with a bilingual multi-provider LLM assistant ("SHAKTI AI") for gym-equipment specification, and **GenZ Spotless**, a 60-second online booking platform for a Sydney-based cleaning company.

Frontend Architect — Supreme IT Solutions

Oct 2025 – Dec 2025

Remote, project-based

- Built **NetoGroup AI**, a unified platform combining Educational Consultancy, Test Prep, and Travel & Tours, including a content-heavy admin dashboard (TanStack Table) for high-volume, multi-vertical data management.
- Implemented Next.js with **SSR and technical SEO** to maximize search visibility across a multi-service ecosystem; used React Query (TanStack Query) for efficient server-state management and reduced API overhead.
- Engineered a high-performance headless storefront for **BT Planet**, a major electronics retailer, on Medusa CMS — optimizing **Core Web Vitals** through asset delivery and component rendering strategy.

Full-Stack Developer & Team Lead — Neutroline

2024 – 2025

- **Promoted from Intern to Technical Lead within 3 months**, taking full ownership of architecture, team management, and technical decision-making for a US-based enterprise startup.
- Directed an AI-powered appointment management system using Next.js, LangChain, and OpenAI/Anthropic, with **Inngest** for durable background scheduling and automated client interactions.
- Hired, scaled, and mentored a cross-functional team of **8+ designers and developers**; owned tech-stack decisions including vector databases (Pinecone/pgvector) for semantic search.
- Established CI/CD pipelines (Vercel, GitHub Actions), maintaining **100% deployment reliability** and high development velocity.

Technical Assistant & Strategy — Excellence Institution Center

2022 – 2023

- Modernized the IT systems of a traditional education business and moved its operations online, building the digital roadmap that let it reach students beyond its physical classrooms.

KEY PROJECTS

MeroBhumi — Real Estate Platform — Client, Live www.merobhumi.com

- Two-sided real-estate platform with an AI chat interface answering from live listing data via tool calling; custom auth, role-based routing, and full IT infrastructure built from zero.
- Integrated **Fonepay** for in-country payments, plus transactional **SMS (SparrowSMS) and email (Resend) alerting** for bookings and account activity.
- Built **role-based dashboards for Buyer, Agent, and Admin**, each with tailored analytics tracking searches, listing views, and saved properties; Admin dashboard includes **granular permission management** for existing users and any new roles Admin creates.

WN Wellness Equipment — B2B Gym Equipment Storefront — Client, Live www.wnwellnessequipment.com

- Bold, **SEO-rich**, server-rendered storefront for a commercial gym-equipment wholesaler serving all 77 districts of Nepal, built around a quote-request flow rather than a cart. Features "**SHAKTI AI**" — a bilingual assistant orchestrated with LangGraph and routed across Gemini, Groq, and OpenAI via the Vercel AI SDK — that helps buyers spec a full gym fit-out conversationally.

GenZ Spotless — Cleaning Service Booking Platform — Client, Live www.genzspotless.com.au

- 60-second online booking site for a Sydney-based cleaning company, with tiered transparent pricing, instant quotes, and a bond-back guarantee. Built with Next.js, TypeScript, and Tailwind CSS.

RBS Unisex Salon & Academy — Booking & Marketing Site — Client, WIP rbsunisexsalon.vercel.app

- In-progress booking and marketing site for a Nepali unisex salon and beauty training academy, with parallel **Book Appointment and Join Classes** flows for gents/ladies salon services and course enrollment. Bilingual (Nepali/English) copy, dark gold-accented UI with light/dark theme toggle, built on Next.js with SSR for local SEO.

Gharedi — Real Estate Marketplace — Personal, Live real-state-gharedi.vercel.app

- Two-sided marketplace with **map-based property search** (MapLibre GL / Leaflet), listings modeled in Sanity CMS, and Clerk-based auth with subscription billing for agents. Built on Next.js 16 / React 19.

Multi-AI — Multi-Agent Chat Platform — Personal, Live, WIP · Microservices / MERN multi-ai-frontend-six.vercel.app

- Designed a **microservices MERN architecture** — an Express API gateway proxying to independently-deployable Auth, Chat, and Agent services, each owning its own MongoDB database, with shared Redis for sessions and message caching.
- Built a **LangGraph multi-agent router** that classifies user intent and dispatches to specialized agents (chat, web search, coding, PDF, PPT, image) across Groq and Gemini, including a two-step search-then-chat pipeline that grounds responses in live Tavily search results.
- Implemented Redis-backed conversation caching (RPUSH/LTRIM/EXPIRE) for **~1ms context reads** on every AI request, and Firebase Google auth with HttpOnly session cookies validated centrally at the gateway.

Additional shipped work: aiCart (AI multi-vendor e-commerce with Gemini-assisted product entry, deployed to AWS EC2 via GitHub Actions), Nest Store (AI shopping assistant, Stripe, Sanity CMS), and Ink Sprout (stationery e-commerce) — plus several earlier full-stack builds spanning auth, payments, and state management.

Full write-ups, architecture decisions, and live demos for every project above: nischaldev.vercel.app

CORE SKILLS & EXPERTISE

- **Languages:** TypeScript, JavaScript, SQL, Python, HTML, CSS
- **Frontend:** Next.js, React 19, Astro, Tailwind CSS, shadcn/ui, Radix UI, Redux Toolkit, Framer Motion, GSAP
- **Backend:** Node.js, Express, REST APIs, Hono, Socket.IO
- **Data:** PostgreSQL, Drizzle ORM, Prisma, Neon, MongoDB, Sanity CMS
- **AI / LLM Systems:** Vercel AI SDK, OpenAI, Anthropic Claude, Google Gemini, LangChain, LangGraph, Groq, MCP (Model Context Protocol), Agent Skills, RAG & tool-calling agents
- **DevOps & Tooling:** Docker, Nginx, Vercel, Git/GitHub Actions, Vite, pnpm, Stripe, Clerk
- **Leadership:** Technical team leadership (8+ reports), Agile/Scrum delivery, client-facing architecture ownership; Vice President, Rotaract (2018–2023) — national-level fundraising and digital-skills training.

EDUCATION

BSc (Hons) Computing — Softwarica College of IT & E-Commerce (Coventry University)

2020 – 2023

A-Level (Science) — Chelsea International Academy

2016 – 2018
